COVER LETTER

Fund Managers & Donors

Dear Potential Grantees and Donors,

Thank you for reviewing this Grant Proposal.

We are the Merrick Foundation Org and Historical and Genealogical Society of members, authors, researchers and patrons. Our foundation was established in 1993 and began our online web site in 2001.

We have several clients and worldwide members since 2001. Our member contribute research, historical artifacts and documents and genealogical studies of American Native and Surname groups including the Meyrick, Myrick, Merrick Royal lines. Many of our members have provided DNA samples that have shown ties to the Mohawk and Seneca Tribes and related RED HOUSE and Hebrew lineages rooting back to the original first humans to inhabit North America. We have organized our publications, papers and books into a data base along with genealogical ancestry that we believe can enhance the world with insight into their own multicultural roots.

To gain a fuller understanding of our concept you may wish to read our Mission Paper

at <https://secureservercdn.net/198.71.233.107/tgi.7dc.myftpupload.com/wp-content/uploads/2021/02/MerrickFoudationOrgMissionFund.pdf>

In this proposal, you'll see information about Merrick Foundation, our goals, objectives, mission, vision, and project details.

We look forward to working with you to answer any questions or provide any submissions or applications for grant funding.

Sincerely,

Daniel W Merrick PhD

Merrick Foundation President

MERRICK FOUNDATION OVERVIEW

ABOUT US

The Merrick Foundation Org is a 509(2)(a) chartered organizations under the parent 501(c)(3) nonprofit CYMG-UCCMA a non-denominational Messianic Jewish Congregation. Our primary mission is to provide worship and educational aids in non traditional worship formats that encourages original roots of faith and worship from ancient origins in Semitic texts, history and scriptures. The Merrick Foundation Organization is a historical and genealogical society of members who engage in ongoing research of the multicultural lineage of the American population.

We provide educational materials, books and workshops to the local community and online to members and clients world wide with over 25,000 books sold through our Amazon publishers. Throughout the years of research and publications including DNA genetic genealogy studies, we have collected a host of out of copyright and print books and artifacts which are in need of a home.

We provide translations in ancient texts of biblical scriptures and manuscripts from sources that contribute to the knowledge of society of the origins of non-organized worship bodies with roots in Hebrew and other tribal rituals and practices. Since the first gatherings of worship by mankind were begun without walls and institutions, we encourage our members and followers to learn historical roots of religions, multicultural genealogy and societal relationships that enhances the overall life long learning experience. For more on our Worship, publications and congregation see <https://www.YahBible.org>

MISSION

Merrick Foundation's mission is to enhance community awareness of multicultural roots, history and origins through education in ancestry, genealogy and genetics (DNA) by providing a library, learning center and community service projects online and in our foundation library by providing workshops and research aids.

VISION

To provide awareness and learning of enhance diversity of origins to provide inclusions in the community as having a common cord of ancestry as cousins. Since we are in fact as proven by science all related to each other within the species of the human genome by DNA, our relationships in community service, good works and worship should be without labels based on bias and prejudice.

National Geographic: "Scientists realized that they might be able to use these distinctive mutations to organize living humans into a single grand genealogy, which could shed light on the woman whose mitochondria we all share—a woman who was nicknamed Mitochondrial Eve. "

(Source: <https://www.nationalgeographic.com/science/article/adam-and-his-eves>)

In Fact, DNA research has discovered that the first man, Adam and the first woman, Eve, were of different genetic traits of mutations that humankind would call today the Caucasian and African origins as Adam being white and Eve being Black. When we trace back the original markers of the Haplotypes, matching the MT DNA and the Y DNA of Adam and Eve has markers of code that proves they were the first biracial couple. Merrick Foundation and Dr. Merrick has been a pioneer of genetic genealogical research since his published paper on this subject in 1999.

MEET THE TEAM

PROJECT DETAILS

INTRODUCTION

Name of the Project

Merrick Foundation Library

Description of the Project

The Merrick Foundation's goals are to establish a permanent community library learning center to house historical artifacts and a learning center to enhance knowledge about genealogy and multicultural roots and origins. We believe that if a person knows where they came from that they will have a better direction in life on where they are going. By providing a means to teach genealogical studies and workshops of genetic genealogical ancestry, we hope to inspire the future generations to embrace the past and become more inclusive in setting goals for their future. We hope to also provide our documentation of historical and genealogical works to historical societies and libraries in future projects and grant fundraising goals. Merrick Foundation has published over 40 books authored by Dr. Merrick and has sold over 25,000 books to date.

Purpose of the project

Construct a Library to provide community history and genealogy learning center. Merrick Foundation's mission is to enhance community awareness of multicultural roots, history and origins through education in ancestry, genealogy and genetics (DNA) by providing a library, learning center and community service projects online and in our foundation library

Goals & Objectives

Goals & Objectives

Provide a multicultural roots learning center to enhance community awareness of their genealogical and diverse ethnic roots and history.

Provide a Library and Museum to house historical artifacts, genealogical records and book.

Provide staff for administration and operations for the NPO

Goals & Objectives

Provide a computer learning center for genetic genealogy and research

Provide a public use meeting area for community NPOs

Provide Jobs for the Local Community to staff this facility

Start Project Date July 2, 2021

Target Completion Date July 2, 2022

Purpose of the project

Construct a Library to provide community history and genealogy learning center. Merrick Foundation's mission is to enhance community awareness of multicultural roots, history and origins through education in ancestry, genealogy and genetics (DNA) by providing a library, learning center and community service projects online and in our foundation library.

TIMELINE

Activity/Description	Start Date	Target End Date
Permits, licenses and architectural Design	04/08/2021	05/20/2021
Demolition of present structure	06/01/2021	07/02/2021
Construction of Merrick Foundation Library	07/02/2021	10/25/2021
Staff Training and Facility Management	10/26/2021	11/07/2021
Grand Opening	11/08/2021	12/31/2021

Dr. Merrick Producer and Host of Syndicated FAITH RADIO

PROJECT DETAILS

GOALS & OBJECTIVES

Provide a multicultural roots learning center to enhance community awareness of their genealogical and diverse ethnic roots and history.
